

Thibault FRIEDRICH

R&D and Ux Developer

EXPERIENCES

CTO & Associate at Elqui | Grenoble | 2013 - 2017

I cofounded a start-up and I was in charge of technical development of an application based on multiple technologies like WIFI, DNS, Qt and Web technologies. As associate, I also contributed to financial, HR and marketing parts. It was a very enriching experience which allowed to get a transverse vision and entrepreneurship skills.

Software developer at Pollen Technology | CEA Grenoble | 2014

During a 6 months internship, I participated to the development of a Java/Eclipse software to extract and compare heterogenous data from R&D nano-technologies. I worked for a start-up incubated in the CEA of Grenoble. This internship was very interesting because I could understand daily life in start-up and large organization in the same time.

ManinTec intern at Pollen Technology | CEA Grenoble | 2013

During my last semester at school, I worked by intermittence for Pollen Technology with a double mission : software development and business strategy. So I was a good foot step in strategy and business development.

Ux developer at Altim | Annecy | 2013

During this internship in R&D Department in Altim, I designed android application based on NFC. This internship was great because it gives me the opportunity to test my skills in UX Modelization since user and environmental constraints were very hard.

EDUCATION

Manintec | Grenoble | 2013 - 2014

A semester to discover management of technological innovation. It brought me skills in strategy, marketing, funding, innovation process...

Ensimag | Grenoble | 2012 - 2013

Computer Engineer Diploma with specialization in software and UX development.

Preparation for the "Grandes Ecoles" | Dijon | 2009 - 2012

Math - Physics - Engineer Science
